

Actively Learn™

Deeper Learning and Critical Thinking for Middle and High School Students

If we want to give students the skills and knowledge to engage in meaningful discourse, solve complex problems, and truly understand their world, we need to prioritize depth in the classroom.

Actively Learn™ is an online literacy platform that empowers teachers with instructional tools that strengthen how deeply students comprehend texts.

Learning deeply requires the hard work of constructing meaning and problem-solving; this way of thinking is not obvious to many students and will not happen without the right guidance and support.

Actively Learn's Activate-Support-Reveal framework and functionality help teachers provide that needed guidance and support through **12 key practices**:

ACTIVATE THINKING

- Asking higher-order questions
- Facilitating discussion
- Encouraging strategic annotation
- Modeling close reading

SUPPORT THINKING

- Building background knowledge
- Improving accessibility
- Scaffolding challenging texts
- Building vocabulary

REVEAL THINKING

- Using formative assessment
- Providing effective feedback
- Promoting writing extensively
- Cultivating metacognition

The Actively Learn Platform Offers:

CONTENT AND INSTRUCTIONAL SUPPORTS

- A broad array of high-interest text and video content, including classic and current popular novels, nonfiction books, short stories, news articles, drama, primary sources, textbooks, and poetry
- Thousands of pre-created interactive reading assignments by grade level for ELA, social studies, and science, including standards-based assignments and sequenced text sets
- Features that enable students to annotate and hear texts, translate passages, define words, learn collaboratively, ask questions, and access supports for Dyslexic readers

CURRICULUM BUILDING TOOLS AND PROFESSIONAL LEARNING

- Digital authoring tools for teachers to customize and enhance any text or reading assignment as well as share and co-create curriculum within their school community
- Importing capabilities to bring any website, PDF, or Google doc into Actively Learn and transform it into an interactive reading assignment
- Built-in professional learning for teachers to implement 12 core literacy practices and demonstrate their understanding with micro-credentials

EMBEDDED ASSESSMENT AND REPORTING

- Data from multiple-choice, short answer, and writing assessments, with simple feedback and grading tools and links to standards-based rubrics
- Reporting in real-time on assignments, including time spent on task, steps completed, and use of the learner's dictionary and annotation tools
- Student proficiency reports tied to standards for educators to make data actionable and an administrative dashboard for views into usage and learning progress
